

NEW **Swivl Personal Robotic Cameraman**

It's the perfect cameraman! The multi-purpose robotic motion platform provides smooth tracking with 360° pan and 25° tilt. The base can be used on a level surface or mounted on a tripod using a ¼"-20 thread. Record high-quality video using your smartphone or tablet; a camera mount (not included) can support a camcorder or DSLR camera weighing up to 6 lbs. The base tracks the motion of a remote marker, allowing you to move freely as long as the marker is in line of sight within 30 ft. You can also control the base using a smartphone or tablet with a Bluetooth® connection, or using Swivl apps for iOS and Android. The remote marker wirelessly captures high-quality digital audio; a 3.5 mm audio out on the Swivl base lets you send that audio directly to your mobile device or camera. The marker's 3.5 mm audio input is compatible with lavalier and handheld microphones. Plug your DSLR camera into the 2.5 mm shutter interface port or the USB port to interface with Swivl apps and create stunning time lapse videos and more. Includes base; remote marker with lanyard; grip adapters to hold mobile devices under ½" thick; AC adaptor; rechargeable lithium polymer battery; charger; and 200 free minutes of storage on Swivl Cloud, a private, secure video hosting service made for professionals, schools, and businesses to store and share content. The free account features login-protected viewing and enables viewer comments. Sh. wt. 2.25 lbs.

NA10207H — \$398.95
