Suture & Stapling
Practice Arm
LF01028U — Light
LF00670U — Medium
LF00673U — Dark
INSTRUCTION MANUAL

5-Year Warranty
ABOUT THE SIMULATOR
This practice and demonstration suture arm should be considered disposable, but with proper care and treatment, it will serve its purpose for a long period of time.

The three "wounds" provided should be considered only samples of what can be done. With a sharp scalpel, additional "wounds" can be cut at any desired depth or location. Each can be repeatedly sutured until the skin at any one site becomes so heavily perforated that it will no longer support more suturing.

The "wounds" can be bandaged with most standard adhesive bandages. Residual adhesive can be removed with Glue-Off (LF01023U).

CARE OF SIMULATOR
Do not use providone-iodine prep solutions. These solutions will indelibly stain the arm. Normal soil accumulated on the surface of the simulator can be removed with mild soap and lukewarm water. Use Nasco Cleaner (LF09919U) to remove stubborn stains from simulator. Simply spray soiled area and wipe clean with a soft cloth or paper towels.

When not in continuous use, it is recommended to store the simulator in the storage box furnished, or cover it with a cloth or sheet of plastic.

CAUTIONS
Solvents or corrosive materials will damage the simulator. Never place simulator on any kind of printed paper or plastic. These materials will transfer indelible stains. Ballpoint pens will also make indelible stains.

SUPPLIES/REPLACEMENT PARTS
LF01011U  Suture Tool Kit
LF09919U  Nasco Cleaner

Actual product may vary slightly from photo. Nasco reserves the right to change product color, materials, supplies, or function as needed.
