Subject: LF01095U Blood Pressure Simulator Redesign  
Date: August 7, 2014

The **LF01095 Blood Pressure Simulator** has been redesigned to improve overall product performance.

The pulse feature is now easier to locate and is more durable and consistent, however, customers will not notice any change in product appearance.

Stock in our warehouse has been updated.

Please note that this improvement to the pulse feature *cannot be updated in the field*. Any faulty pulse mechanisms will need to be returned to Nasco for repair if needed.

If you have any further questions, please contact:
