

The increased emphasis by OSHA on chemical hazards, and the new Toxic Substances Control Act, make it imperative to obtain as much information as you can about the chemicals you use.

One way is to ask your suppliers to complete this Material Safety Data Sheet (Form OSHA 20) for each chemical you purchase from them. The form can be reproduced. Or you can obtain extra

copies from the nearest OSHA office, together with a booklet (OSHA 2265) of instructions for completing the form.

(Note: Form OSHA 20 is presently required only for companies in the maritime industry. Nevertheless, the information it furnishes is important for all businesses using chemicals.)
